# Lorington

Lorington Collection with acoustic backing is designed to transform interiors into environments of clarity and calm. By limiting sound transfer between rooms and floors, it creates spaces that support focus, connection, and restorative experiences. From senior living to workplace and education, Lorington's acoustic performance enhances well-being—delivering both functional value and elevated design.

## Performance Features

### Durability

Built for demanding environments, Lorington combines acoustic performance with long-lasting strength, standing up to daily traffic while maintaining its sound-reducing benefits.

### Biophilia/Biophilic Design

Sound plays a critical role in biophilic design. Lorington's acoustic backing reduces noise and echoes, creating calm, restorative spaces that support focus, relaxation, and well-being.

### Cost Reduction

With acoustic control built in, Lorington eliminates the need for extra sound-mitigating materials, reducing project costs and streamlining installation.

### Noise Reduction

Lorington's acoustic backing limits sound transfer between rooms and floors, creating quieter, more focused, and productive environments.

## Edge Effects Wall Base Collection

An architectural accent, creating the elegant effect of a milled wood base without the expensive installation, indentations, scuffs, and abrasions. Requires no nailing, priming, or painting. Co-extruded thermoplastic rubber (type tp) engineered for flexible application to walls, corners, and columns.

### 40 Colors

### 16 Styles

In a smooth, matte finish for a flawless look in any room.

### 7 Profile Heights

Style-dependent, in four thicknesses.
