

## Amtico Feature Stripping Installation Guidelines

### GENERAL INFORMATION

These instructions cover installations of Mannington Commercial Luxury Vinyl Plank & Tile Floors (LVF) Amtico feature stripping.

- Add contrast
- Create a grout effect
- Define tile and plank shapes
- Available in five sizes
- 2 mm or 2.5 mm thicknesses\*

**\*NOTE: For beveled edges, 2.0mm is recommended and for unbeveled edges, 2.5mm is recommended.**

### INSTALLATION

**Follow all Mannington Commercial LVF installation instructions concerning jobsite conditions, proper adhesive applications etc.**

Feature stripping can be installed around the perimeter of each tile or plank. Install strips as you go, pushing them tightly so there is no gap. Do not use spacers.

Place feature stripping within material assembly to assure that net fit has been accomplished.

End-joint grout lines should fit perfectly between grout lines that run alongside of the vinyl planks. Extend plank-side grout line material minimum 6" beyond end-joints to avoid creating a three-way intersection.
