Design Solutions

Expert Design Support for Every Project

At Mannington Commercial, we believe a well-designed space has the power to inspire, connect, and shape how people interact. We're also committed to making the design process faster and easier for our customers.

Our **Design Solutions** team brings together experts in interior, textile, and graphic design to support you at every stage of your project. Whether you're developing a concept for a single room or planning a full facility, we simplify the process, provide clear design options, and ensure your flooring solution is as functional as it is inspiring.
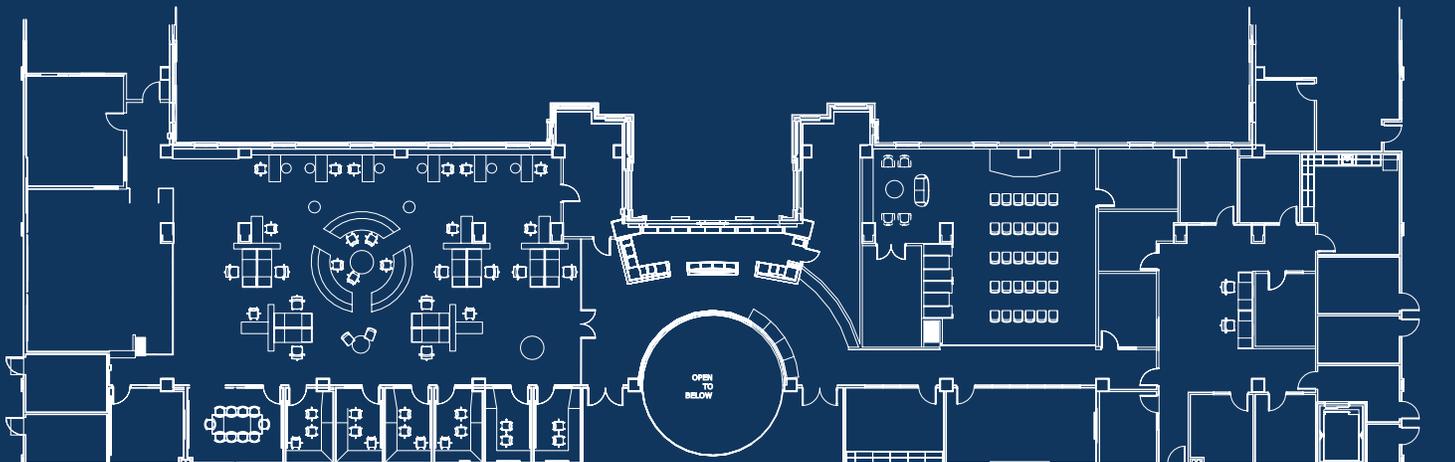

OUTPERFORM | Mannington COMMERCIAL

What We Deliver

Even the most complex flooring designs can be installed seamlessly with the right tools. That's why our Design Solutions team provides a full set of visuals and resources to help you communicate ideas, guide decisions, and prepare for installation. These deliverables turn flooring concepts into clear, workable plans that keep your project on track from start to finish.

Room Scenes	Stock images, photos of the existing space, black & white or color model drawings.
Finish Plans	Color-coded drawing of the floor layout that shows product placement across the space.
Rendered Plans	Realistic JPG images rendered into the floor layout to show how products work together.
10×10 Overheads	High-res image that allows you to see the detail of the product or pattern repeat.
Composites	A combination of the product/pattern repeat in detail and the room scene within one image.
Configurations	Floor designs that include multiple products.
Installation Plan	Color-coded guides with high contrast colors of the floor layout to make it easy for installers to identify the products and patterns being installed in each area.
Phasing Diagrams	Color coded drawing of the floor plan that clearly defines which area of the building the Installer will start the job. This is a value-added service if needed that includes yardage or square foot information to show how many days or nights it will take to install the job.
Construction Documents	Ready-to-use digital files and detailed documentation that make it easy to integrate flooring designs into your project plans.
Revit Files	Scaled high res image of rendered floor plan. So it can be inserted into the Revit model.
Estimate	Quantities for all materials.
Sustainability Data	Embodied carbon estimate provided with design documents for use in your sustainability reporting.

Benefits of Working With Design Solutions

Our team can help define the vision for your space, guide you through the process of choosing the right products from our full portfolio, and explore layout options. That support translates into real advantages for your project:

Time Savings
Speeds up the decision-making process, saving time and money for all parties.

Smarter Decisions
Options tailored to your budget, performance needs, and design goals.

Clear Communication
2D and 3D renderings that make it easy to share and visualize design intent.

Trusted Partnership
A collaborative team invested in your success, project after project.

How It Works

Getting started with Design Solutions is quick and collaborative:

1. **Reach Out**
   Contact your Mannington District Manager to request design assistance.

2. **Share Your Vision**
   Provide your design intent, scope of work, and any CAD files or photos of the space.

3. **Collaborate**
   Let us know what stage of the design process and deliverables you need. A member of our team will email or call to review the job if needed.

4. **Receive Results**
   Turnaround is typically 48 hours for smaller projects and 3–5 days for larger ones.

Contact your local Mannington District Manager to get started.
