

## Acoustics

---

Built on Its TRU® Technology, Attune offers multiple acoustic benefits by reducing in-room sound, supporting patients and staff in healing environments and students and educators in schools.

SOUND POWER LEVEL (DBA)

*Floor impact sound testing results, ASTM E3133*

## Healthcare Benefits

- > Easier for patients to fall asleep and stay asleep
- > Helps calm the cardiovascular system
- > Supports healing with a soothing environment
- > Reduces staff stress symptoms and burnout
- > Improves communication among staff

## Education Benefits

- > Reduces noise during group activities
- > Supports communication and supervision of students
- > Creates a more focused, less chaotic atmosphere for transitions between activities

## Ergonomics

---

Attune reduces fatigue through a precise balance of comfort and support. Its impact-absorbing surface cushions steps while providing responsive support to ease joint pain and muscle fatigue.

Beyond its ergonomic and acoustic benefits, its TRU® technology's proprietary fusion-bonding withstands heavy rolling loads. The vulcanized rubber backing resists indentation and fully recovers, unlike foam-backed options that break down over time—ensuring long-term performance in healthcare and educational settings.
