

frē lock **TABS**

makes modular installation fast, simple, reliable, and open to traffic immediately.

A dry installation system with the flexibility to be a floating floor or to adhere to the subfloor, frē lock tabs are now available for use with Mannington modular carpets with Infinity® and Infinity® RE high performance backings. frē lock tabs are applied directly to the back of each carpet tile during installation—odorless, clean, hassle-free, and designed to perform. For more information on Infinity® and Infinity® RE backings visit www.mannington.com/commercial/CarpetBacking.aspx

eco-savvy modular installation system

- No need for liquid adhesives, buckets, or trowels
- No shipment of adhesive pails translates to lower cost and reduced energy
- No VOC's: no ventilation concerns, no odor, and no spills
- Eliminates down time and occupancy disruption associated with traditional liquid adhesives
- Allows for immediate floor traffic
- Dry installation system is ideal for use over raised access floors
- Ease of removal allows for quick and simple flooring replacement

environmental attributes

- Reduced freight and energy required for shipping (1 roll equals the coverage of 2 gallons of liquid adhesive, reducing freight and energy)
- Meets CRI Green Label Plus certification
- Carpet can be reclaimed through Mannington's LOOP® carpet reclamation program
- 100% recyclable
- frē lock leaves no adhesive residue on subfloor
- ISO 14001 registered manufacturing facility
- Contributes to LEED credits

warranty

- 3 Year Limited Warranty
