## We are committed to doing the right thing.

“Do the right thing” is a core value for Mannington, and for more than 30 years of domestic carpet production, we have worked to make a positive impact on our customers’ health, the environment, and our communities. 100% of our Infinity 2 Modular backing is manufactured in Calhoun, GA, at a Mannington-owned and operated facility.

**Mannington**  
COMMERCIAL

- The facility is [ISO 14001 certified](#); our facility demonstrates and maintains third-party verified industry best practices for environmental management.
- Mannington's facilities and our two PVC resin manufacturing vendors' facilities are +Vantage Vinyl verified, meaning the facilities demonstrate third-party verified industry best practices for material health, environmental stewardship, social diligence, economic soundness, collaboration, and open communications.

Mannington's commercial Infinity 2 Backing is [CRI Green Label Plus certified](#) and [NSF/ANSI 140 Gold certified](#). It has both a product-specific Environmental Product Declaration and a Health Product Declaration. These third-party verified transparency documents convey to you an objective accounting of our products' impact on planet and people.

Mannington Commercial Infinity 2 Backing has eliminated more than 15 legacy additives that are cause for concern, such as:

- Asbestos
- Bisphenol A
- BTHC
- Cadmium
- DEHT
- DINCH
- Flame retardants
- Hexavalent chromium
- Lead
- Mercury
- Ortho - phthalates
- PFAS/PFOS/PFOA
- TOTM/TEHTM
- Trialkyl tin compounds
- "Conflict minerals"

## Dedicated to reducing waste.

Manufacturing waste represents more than a disposal challenge — it's lost raw material, lost labor and time, and lost revenue. We're working across the product lifecycle to reduce waste and advance circular practices.

That starts with our suppliers, where we're eliminating shipping and handling waste before it reaches our facilities. In carpet manufacturing, we're improving processes to reduce waste at the source. What remains goes to recycling services or, as a last resort, waste-to-energy generation. It's an ongoing effort, and we're committed to sharing our progress. For our modular plant specifically, here's a snapshot of the last three years:

YEAR	WASTE INTENSITY	ALL PROCESS WASTE RECYCLED INTENSITY
2023	0.0947 pound, or 1.5152 oz / pound of product produced	0/ pound of product produced
2024	0.0718 pound, or 1.1488 oz / pound of product produced	0.3828/ pound of product produced
2025	0.0760 pound, or 1.216 oz / pound of product produced	0.3395/ pound of product produced

## Longer-lasting products mean more sustainable interiors.

Mannington's reputation is built on industry-leading performance and standing behind that performance. Products built to perform and last can reduce or eliminate the number of times flooring needs to be replaced.

- Raw materials are rigorously vetted to avoid contaminants and improve performance.
- Long-lasting products reduce: the amount of energy required to manufacture flooring; the embodied energy of a project; material consumption; and end-of-life disposal challenges.
- Performance-focused designs allow us to offer warranties of up to 15 years.
