

The image shows a large, open-plan interior space, likely a clubhouse or lounge. The walls are made of red brick, and the ceiling features dark wooden beams and several large, modern chandeliers made of brass rings with warm-toned lights. The floor is a mix of dark wood in a herringbone pattern and a colorful geometric tile pattern in shades of blue, green, and orange. In the background, there are two large arched windows with black frames. To the left, there's a green cabinet and a red sofa. To the right, there's a bar area with white stools and a large potted plant.

Case Study:

The Clubhouse, Hox Haus

When Manchester-based architects and designers 74 completed the major project of extending and remodeling a Grade-II listed, two-story Victorian brick building, Amtico Signature was chosen to add texture and an understated elegance to the multipurpose venue.

Challenge

Hox Park is a mixed use, master-planned development for students attending Royal Holloway, University of London. Manchester-based architects and designers 74 sought to extend and redesign an existing Grade-II listed, two-story Victorian brick building containing a variety of multifunctional spaces for studying and socializing. The repurposed building, Hox Haus, needed to serve as the central focus, clubhouse and social amenity for the Hox Park student campus.

Solution

As a durable option ideal for high traffic areas, LVT from the Amtico Signature Collection was chosen to add distinctive patterns and stunning detail as well as high performance. Ink Wash Wood was used throughout the Clubhouse, linking the finishes between the first and ground floors, including the internal stair treads. To create zones within the space, the Basket Weave Signature Layout was laid in neutral Woods and a bright Abstract color to provide the grounding for a games area. The lighter, natural grain of Nomad Oak was chosen to complement the Ink Wash Wood in the quiet study area of the first floor Gatehouse extension.

Benefits

- > Amtico Signature LVT features a 2.5 mm thickness and 1 mm wear layer, combining sophisticated designs with high performance
- > Signature Layouts and ease of customization allow unique patterning and visuals for creating distinctive spaces
- > LVT with Quantum Guard® technology offers superior durability and ease of cleaning

Location:
