

## **Broadloom Carpet Stretch-In (EasyBac) Over Cushion Installation Instructions**

**See CRI-104 for Stretch in Installation (Section 16)**

**For stretch over cushion using the tack strip method, strictly follow the guidelines found in the Commercial Carpet Installation Standard, more commonly known as the CRI-104 (2015).**

**BEFORE STARTING INSTALLATION:** *Inspect for concealed damage, manufacturing defects, and shipping errors (example: wrong color, style, etc.).*

**WARRANTIES:** *Mannington Commercial specifically excludes claims involving carpet which has been cut and installed with visible manufacturing defects.*

**NOTE:** *Should other trades perform work in areas where Mannington Commercial carpet has been installed, the installer and/or general contractor assumes total liability for damage and deterioration, including wear, compaction, soiling, staining, and abrasion. Failure to provide adequate protection until occupancy may void all Mannington Commercial warranties.*

*For specific questions or installation instructions not addressed in the CRI-104 document contact **Mannington Commercial Technical Services at 1-800-241-2262.***
