# Content Overview

The patterns in our Studio Loop collection are designed as slow compositions of color and texture. A layered gradient unfolds across a generous 6' repeat, allowing hue to drift, overlap, and soften as it moves through the pattern. When installed, each plank naturally finds its place, creating gentle color pools and a relaxed, organic wash across the floor—no rigid layout required. The result is a surface that feels intuitive and effortless, delivering visual richness, natural variation, and design freedom with every installation.

An accent tile can be introduced to add a fresh, modern lift to the space. The vibe tile is mixed in at random, bringing a fresh hue to the overall color flow.

The breath of the color line is captured in overhead room scenes throughout this document in pattern Sketchflow.

\*Renderings reflect the general pattern and layout; subtle color and texture nuances are best represented through product photography\*

## Unique. Warm. Playful.

Studio Loop is a modern tribute to the craft of punch needle rug hooking--an expressive, looped textile technique rooted in 19th-century North America. Inspired by its rich history of creativity, resilience, and hand-made artistry, this collection reinterprets the rhythm and tactility of the original craft into playful, textural carpet tiles designed for today's dynamic office environments.

# Vibes Only

The intent of this mixed Vibe and neutral installation is to create subtle moments of accent throughout the floor, allowing the Vibe tiles to appear as intentional pops of color and movement. While the collection is designed with this balanced approach in mind, fully flooding the floor or creating concentrated areas of Vibe is absolutely encouraged as another way to push the concept to its fullest potential—resulting in dramatic pooling, layered movement, and immersive moments of color throughout the space.
