

Spacia 36" x 36" LVT Product Installation Guidelines

GENERAL INFORMATION

These instructions cover additional information for installation of Mannington Commercial Spacia 36" x 36" Luxury Vinyl Tile. This guideline is specific to the 36"x 36" product size. For complete details this document must be used in conjunction with our Installation - Amtico / Spacia LVT Products guidelines, found [HERE](#).

PRODUCT

- Spacia 2.5 mm
- 36" x 36" LVT
- Square Edge Only
- 2 Colors (Terrazzo Visual)
 - Gibson 2603 (White)
 - Julep 2606 (Grey)

PROCESS

Due to the large size, the 36" x 36" tiles may show gapping and/or run off more frequently than smaller tiles or planks. This is not considered to be a manufacturing defect. If this does occur, a recommended option is to use Color Rite acrylic to fill in seams to help with the overall aesthetics. After installation of the flooring, if needed apply a small bead of acrylic down the seam edge. The acrylic must be immediately removed. Wipe-off excess with a wet cloth and rinse with clean water. Once dried, the haze is very difficult to remove.

ACRYLIC FILLER INFORMATION

- **Color Rite Inc.**
 - colorriteinc.com
 - 855-822-2855
