Content Overview

The patterns in our Studio Loop collection are designed as slow compositions of color and texture. A layered gradient unfolds across a generous 6' repeat, allowing hue to drift, overlap, and soften as it moves through the pattern. When installed, each plank naturally finds its place, creating gentle color pools and a relaxed, organic wash across the floor—no rigid layout required. The result is a surface that feels intuitive and effortless, delivering visual richness, natural variation, and design freedom with every installation.

An accent tile can be introduced to add a fresh, modern lift to the space. The vibe tile is mixed in at random, bringing a fresh hue to the overall color flow.

The breath of the color line is captured in overhead room scenes throughout this document in pattern Sketchflow.

Renderings reflect the general pattern and layout; subtle color and texture nuances are best represented through product photography

Unique. Warm. Playful.

Studio Loop is a modern tribute to the craft of punch needle rug hooking--an expressive, looped textile technique rooted in 19th-century North America. Inspired by its rich history of creativity, resilience, and hand-made artistry, this collection reinterprets the rhythm and tactility of the original craft into playful, textural carpet tiles designed for today's dynamic office environments.
