The Food Hotel in Neuwied near Koblenz is arguably one of Europe's most unusual and interesting hotels. The design of each of the 46 rooms represents a food or beverage brand, for example Coca Cola, Mars, Apollinaris and Veltins.

"I am glad we found Spacia for our extraordinary project," said architect Alexander Stenzel. "I like the style and quality of the floor but I'm also very happy about the collaboration with Amtico International."
